

## Surge Protector for Peripheral Equipment

GENERAL:

This note provides information for the surge protection equipment for the Automated Surface Observing System peripheral equipment. The surge protector is used on peripheral equipment not connected to the acquisition control unit or the protective facility power. This surge protector is to be used for the operator interface device, video display unit, controller video display, and printer.

The surge protector may be ordered from the National Logistics Supply Center (NLSC) using Agency Stock Number (ASN) S100-10-3. Personnel requiring this item will either initiate an order using the consolidated logistics system or contact their designated regional focal point.

Below is the description and ASN to use when ordering this item.

PROCEDURE:

1. Order the following from NLSC:

DESCRIPTION	NSN	ASN
Protector, Surge	5920-01-438-3444	S100-10-3

EFFECT ON OTHER INSTRUCTIONS:

None.

REPORT MAINTENANCE ACTION:

None.
